Summary of significant accounting policies and other explanatory information:

Company Overview

OFM Solutions Private Limited was incorporated on 13.01.2019. The Company is engaged in the business of furniture solutions for domestic and industrial purposes.

1. Significant Accounting Policies

1. Accounting Conventions

The financial statements have been prepared on going concern basis under the historical cost basis, in accordance with the generally accepted accounting principles in India and in compliance with the applicable accounting standards as specified under section 133 of Companies Act, 2013 read with Rule 7 of the Companies (Accounts) Rules, 2014 (as amended).

The accounting policies adopted in the preparation of financial statements have, in all material respects, been consistently applied by the Company and is consistent with those used during the previous year.

2. Fixed Assets and Depreciation/ Amortisation

Fixed Assets are stated at cost of acquisition or construction less accumulated depreciation/ amortisation. The Company capitalise all costs relating to the acquisition, installation and construction of fixed assets, including interest on borrowed funds used to finance the construction and acquisition of fixed assets, up to the date when the assets are ready for commercial use. The Company provides depreciation on Straight Line Basis.

Assets individually costing less than Rs. 5,000 are fully depreciated in the year of acquisition/ construction.

Consideration is given at each Balance Sheet date to determine whether there is any indication of impairment of the carrying amount of the fixed assets. If any indication exists, an asset's recoverable amount is estimated. An impairment loss is recognised whenever the carrying amount of an asset exceeds the recoverable amount. The recoverable amount is the greater of the net selling price and value in use. In assessing value, the estimated future cash flows are discounted to their present value based on an appropriate discount factor.

3. Revenue Recognition

Expenses and Income considered receivable and payable are accounted for on accrual basis. Revenue is recognised to the extent that it is probable that the economic benefits will flow to the company and the revenue can be reliably measured.

4. Taxes

Tax expense comprises of current tax, related to earlier years & deferred tax.

Income tax is accrued in the same period that the related revenue and expenses arise. A provision is made for income tax annually, based on the tax liability computed, after considering tax allowances & exemption. Provisions are recorded when it is estimated that a liability due to disallowances or other is probable.

The difference that result between the profit considered for income taxes and the profit as per the financial statements are identified, and thereafter a deferred tax asset or deferred tax liability is recorded for timing differences, namely the differences that originate in one accounting period and reverse in another, based on the tax effect of aggregate amount of timing difference. The tax effect is calculated on the accumulated timing difference at the end of an accounting period based on enacted or substantively enacted regulations. Deferred tax assets are recognised only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised.

5. Provisions & Contingent Liabilities

The Company recognises a provision when there is a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of obligation. A disclosure of a contingent liability is made when there is a possible obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation that the likelihood of outflow of resource is remote, no provision or disclosures specified in Accounting Standard 29 - 'Provisions, Contingent Liabilities and Contingent Assets' is made.

6. Provision & Doubtful Debts

The provision for doubtful debts reflects best estimate of probable losses inherent in the accounts receivable balance, as determined by the Management and approved by Executive Committee of the Board. The allowance is determined based on the aging of accounts receivable balances and historical write-off experience, net of recoveries.

7. Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities on the date of the financial statements and the results of operations during the reporting periods. Although these estimates are based upon management's knowledge of current events and actions, actual results could differ from those estimates and revisions, if any, are recognised in the current and future.

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period.

8. Earnings per Share

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period adjusted for the effects of all dilutive potential equity shares.

9. Contingent Liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognised because it cannot be measured reliably. the Company does not recognise a contingent liability but discloses its existence in the financial statements.

Notes on Accounts

Amounts in the financial statements are presented in ₹, except for per share data and as otherwise stated.

The previous period figures have been regrouped/reclassified, wherever necessary to conform to the current period presentation.

2. Share Capital
